If you smoke, your chance of losing your teeth to periodontal disease increases by 246%!

Statistically a score of 4.32 or less, means you should never lose a tooth.

Mean Score on Teeth Extracted	Years Survived
Prior to/at surgery 8.68	N/A
In maintenance 6.54	15.4
Never 4.32	24.2

Criteria for Success

- Have the treatment we recommend done
- Clean your teeth daily
- Have your teeth cleaned on the schedule we recommend
- Stop smoking or at least cut back*
